

Senior Platform Developer

Reference Number: GR_SPD2014_2

As an integral part of our European expansion strategy, we are happy to announce that we recently opened an XM representative office in Athens, Greece and we are seeking to recruit a high caliber, ambitious and energetic professional to join the IT team!

The key responsibilities of the role include:

- Managing the software development team
- Developing software programs and utilities used in the company and ensuring that the latest software applications for trading related systems run properly
- Recommending software upgrades for existing systems
- Reviewing current systems and presenting ideas for system improvements, including cost proposals
- Producing detailed specifications and implementing the program codes
- Testing the product in controlled situations and rectifying any problems before going live
- Using versioning control systems
- Assisting in the preparation of training manuals for users
- Responsible for the maintenance of the systems once they are up and running

You must meet the following criteria:

- BSc/MSc in Computer Science, Engineering or any other relevant degree
- Minimum of 2 year experience in a similar position at a management level and in Design Patterns
- Excellent knowledge of C/C++, C# or Java. Event driven programming skills, databases, versioning control systems and software testing techniques at virtually all levels: unit, integration, system and acceptance is considered an advantage
- Excellent people management and leadership skills
- Proactive, sharp and efficient
- Ability to work autonomously
- Problem solving and critical thinking skills

Remuneration: An attractive remuneration package will be offered to the successful candidate

Type of employment: Full time

Location: Athens, Greece

Please forward us your CV to careers@trading-point.com quoting the above job reference number.

All applications will be treated with strict confidentiality!
